Sustainability

Recycling Grain - Spent grain goes to local farmers for livestock.

Recycling as much water as possible - The cooling water in the heat exchanger is used for heating in the next brew.

Ethical and sustainable sourcing agreements – The oysters served at Whalesbone are sustainably farmed. Clocktower then reuses the shells in their Oyster Stout. After several months of being tried and tested at the Whalesbone, Clocktower now offers the Oyster Stout at all their Ottawa locals.

Inspiration

The folks at Clocktower wanted to do something different and fun that hasn't really been done before. In 1996, that included micro-brewing and a brew pub was the way to go.

It was never about making the next big hit for them. They were – and still are – focused on making approachable drinkable high quality beers.
